Nevada City Nugget

VOLUME III, NUMBER 18 THE GOLD CENTER NEVADA CITY, NEVADA COUNTY, CALIFORNIA, THE COUNTY SEAT PAPER MARCH 18, 1929

ANCHO WATER SUPPLY BETTER RESULT STORM

Good progress is now being made in the development of the Ancho mine. Early in the month the water runoff began to increase until at this date ample water is available for running the present plant up to capacity. Two development faces are being driven on the main tunnel level and a new stope is being started simultaneously with the carrying up of a stope begun at an earlier date. There are ample faces in ore to insure the operation of the mill for some months to come without new development. However at the present time a large percentage of th mill feed is coming from development work and there is ample assurance that this condition will prevail to a certain extent for some time to come at least.

The most important work being undertaken at this writing is the driving of the main tunnel toward the Erie property. This tunnel will develop the Ancho vein to the limits of the length of the Erie property. Several crosscuts from this tunnel are planned for the development of some parallel veins that seem to show promise. The driving of a lower tunnel is in contemplation and actual work on it will probably be commenced later in the spring. Continuous operation of the mine and mill plants will be possible from this date.

There is promise of increased mining activity throughout the East belt with the coming of spring and summer and there seems little doubt but that this will assume important proportions if the power company perfects a plan to supply the district with electric power. Insofar as a line into the section would prove a minor undertaking for the P. G. & E. as compared with many of the developments of that great corporation, and due to the fact that the East Belt promises to be a real center of activity for the mountain counties from which the power originates, it seems reasonable to assume that a power line will be an accomplished fact in the not distant future.

THOMAS GEACH PASSES

Thomas R. Geach of Grass Valley passed away Saturday afternoon at the fmily home following a brief illness: Deacesed was past 64 years of age and leaves a widow, three sons, a daughter, step daughter and a sister. Fueral services will be held from the chapel of W. R. Jefford and Son tomorrow Tuesday afternoon at 2 o'clock. Mr. Geach was a constractor of note and had erected a number of structures in Grass Valley.

SEAWELL BACKS OLYMPIAD

Assemblyman Jerrold L. Seawell will introduce in the assembly a concurrent resolution calling on the state to support the winter sports program of the Olympic games to be staged in this state. It is hoped and planned that these will be held at Truckee and Lake Tahoe. Promotion Board Secretary Roberts has been active in the movement.

LARGE CLASS CONFIRMED

A class of seventeen was confirmed at Trinity Episcopal church on Sunday morning on the occasion of the annual visit of the Rt. Rev. W. H. Moreland, Bishop of the Sacramento Diocese. The offertory solo was sung by Oakley oJhns.

PALM SUNDAY MARCH 24th

Next Sunday is Palm Sunday and will be appropriately observed at both St. Canice's Catholic Church and Trinity Episcopal Church. The latter services will be held in the evening. Easter Sunda ycomes the following Sunday.

Reserve your copies now of the special mining number to be issued by The Nugget the coming month if you want to boost Nevada County and see our mining once more preeminent.

The weather is threatening another storm.

Miss Margaret Moulton of French Corral was a Saturday visitor.

Chocolate decorated Easter eggs ta Colleys. 17-18ch

COMPRESSOR IS BEING INSTALLED AT MOHAWK

The new air compressor at the Yakima Mohawkproperty is being installed and will make possible much faster progress in the sinking of the shaft to its 200 foot objective. The foundations were completed Friday. The bottom of the shaft is now in solid rock and comes as a pleasant sensation after the difficulties that have been encountered so far. The shaft is between 75 and 80 feet deep now and with the air drills at work rapid progress should be made. The compressor is an 11X12 and will handle four small drills.

WESTERN MERGER CAR CONCENTRATES $5000

The car of concentrates shipped by the Western Merger to the Selby smelter showed returns of approximately $5000 from 45 tons states President A. A. Codd. February propuction from the plates totalled $1364.17 with the mill operating one shift.

Drifting operations are being prosecuted on a new vein known as the C vein which was cut on the 400 level about 75 feet west of the shaft. The vein shows an average width of four feet and samples around $4. per ton. The vein is a promising one and will be thoroughly exploited. The cross cut on the 400 level to reach the Jackson vein had advanced 235 feet from a point 50 feet east of the shaft. Two shifts are now working in the crosscut and are making about seven feet a day in hard rock. If the vein dips at the same angle as the A vein in which the shaft was sunk it is possible that the Jackson vein will be cut in two weeks' more work.

H. B. Skewes is superintendent in charge of operations.

MANHEIM-DIBBERN & CO. GRASS VALLEY OFFICE

Manheim-Dibbern & Co. are today opening a branch office at Grass Valley under the direction of Leland V. Mitchell, prominent California banker. Michell was assistant manager of the Nevada County Bank for 10 years and recently became an executive officer in the Grass Valley branch of the Bank of America of California. He is prominent in investment, banking and fraternal circles of the state and is a native of the Mother Lode district.

This branch will be known as the Northern California branch of Manheim, Dibbern & Co., and clients in the surrounding districts as far east at Reno, north to Quincy, south to Placerville and west to Sacramento will be offered investment and quotation service from this office.

This is the first step of Manheim-Dibbern & Co. in a program which is expected to lead to the establishment of other branch offices throughout the state in the not far distant future.

DONATION DAY APRIL 5th

Friday April 5th will be observed by thhe Nevada City Benevolent Saciety as Donation Day. The affair is to be in charge of the Elks which assures its success.

Dr. R. F. Werner performed a tonsileptomy on J. H. Mason at the Nevada City Sanitarium on Saturday.

Among thoe attending the funeral of the late Victor E. Austin at Chico are Mrs. W. C. Austin, R. A. Noell and Mrs. Andrew oGering and daughter.

Mr. and Mrs. Charles H. Ninnis are visiting in Los Angeles.

Joseph O'Neill has gone to Sacramento for a brief stay.

Mrs. Robert Taylor of Toledo, Ohio, is the house guest of Mr. and Mrs. H. W. Westbroook of Grass Valley.

Mrs. Rita Beloud of Grass Valley was a Sacramento visitor Saturday.

Supervisor Henry Goudge was over from Grass Valley yesterday to attend the confirmation services at Trinity church.

COMING MINING REVIEW IS CREATING MUCH FAVORABLE TALK BY PEOPLE

Since the initial announcement made last week of the forthcoming special issue of The Nugget to be devoted to a review of mining conditions in Nevada and Sierra counties, a great deal of favorable comment has been heard from all sides on the enterprise of this paper in attempting to put the idea over and much support has been promised in the purchase of space in the edition and in extra copies to send out.

The price of copies has been set at 15 cents for single numbers. In 100 lots they will be priced at 12½ cents and in 1000 lots at 10 cents each. The fine book paper used in the edition will cost 3 cents per copy alone. The best of press work will be used which will make the edition a costly one to produce but from the advance interest which is being taken the effort promises to be sufficiently appreciated to make the enterprise a feasible one. The interest manifested in a tangible way by the various civic organizations of the county in the issuance of the edition is one of the most encouraging features met with in the preliminary work.

The state and government officials connected with the supervision of the mining industry have taken a lively interest in the project from the outset and will supply authentic copy on conditions in mining particularly with reference to this section of the state. The idea has been treated by the press of the country over as being a fine undertaking and as something out of the ordinary.

The spirit of cooperation shown generally throughout Nevada City and Grass Valley is highly appreciated by the publishers and indicates that our efforts the past three years to create a renewed interest in getting our gold mining back on a firm foundation once more in this and adjoining counties have not been in vain in the minds of the business men. Gold mining is distinctly on the upgrade in this section and the coming year will see many new companies coming into this field to develop our mineral resources. At least twenty new companies have entered this field during the past year and taken properties by purchase, option and bond. Large scale operations are necessary in the face of costs of development and operations and our resources are such that they will justify large expenditures for development.

The forthcoming edition will cover the essential facts regarding our mineral resources and give a brief history of what has been accomplished since the days when gold was first discovered but a few miles to the south of Nevada City. Use the blank printed elsewhere in this issue to place your order as we wish to know what size of an edition to print. The minimum issue will be 5,000 copies and it may have to be many more if the demand develops as is apparent at this early stage.

GRASS VALLEY CHAMBER EXPRESSES APPRECIATION

My Dear Mr. Willoughby:

You are to be heartily commended in the timely and progressive step you are contemplating in the publishing of the proposed mining journal.

The office of the Grass Valley Chamber of Commerce has long experienced the need of just such a bulletin of mining information, and will greet it with a warm welcome indeed.

Mr. Waynflete has been authorized to report to you to what extent you may depend upon this office in helping meet the expense of the special mining publication.

President Smart, who is also fully sold to the idea suggested to me that I write this brief expression of our endorsement and approval.

Sincerely yours,
E. O. Chapel, Secretary.

HIGHWAY TO BE OILED

The Tahoe Unkiah state highway is to be oiled westward from Rough and Ready several miles to the Bridgeport road junction this summer which will give a paved highway over half the distance to Smartville from Grass Valley. The roadway has been widened in a number of places in preparation for the proposed improvement.

The many friends of Mrs. Theodore P. Rundy will be pleased to learn that she is at home and has practically recovered from an operation conducted at the University Hospital, San Francisco.

The banquet staged by the horseshoe pitchers Saturday night attracted a large gathering at Odd Fellows hall. Raviolas and roast turkey were the centerpiece of the banquet and went by the boards in jig time. The toastmaster of the vening was C. W. Chapman and there were numerous speakers. Louis Maragroli gave several accordeon numbers that called for prolonged applause.

M. D. Coughlin was in Sacramento on business Saturday.

Mrs. Hans C. Jepsen and mother are home from a trip to Oakland to visit relatives.

Mr. and Mrs. John W. Darke are home from a trip to aSn Francisco to visit relatives and friends.

Mrs. James C. Tyrrell and daughter Winifred returned to Grass Valley from Berkeley yesterday.

John Bach of Smartsivlle was a Saturday visitor.

Easter rabbits, baskets, candies and novelties at Colleys. 17-18ch

HOGE GIVES VIEWS SPECIAL MINING ISSUE

Dear Mr. Willoughby:—

In reference to your special mining issue, it is my opinion that the same will be of great benefit to this community in many ways.

It will serve to attract the attention of the outside public to our most important industry, which is gold mining. In the development of this most important industry, we are adding to the world's wealth, and are incidentally spending a goodly portion of that wealth in our own locality, and adding in the general prosperity of the entime community.

Your paper is the only one that has endeavored to foster the mining industry, and to give the up-to-date facts in reference to the same. And for that reason alone, although I might name others, I feel that you should have the whole hearted support of everyone in Nevada and Sierra counties.

These two counties, I believe, contain more hidden wealth awaiting systematic development, than any other 2 counties in the entire United States. And when the true facts are known by the outside public, through the medium of your special and regular issues, I believe that we shall have real prosperity for all concerned.

Wishing you the success that I feel you deserve I am,

Sincerely yours,
Arthur W. Hoge.

Editors Note:

The above letter by Mr. Hoge is heartily appreciated. Mr. Hoge is President of the Hoge Development Company and Vice President of the Nevada City Chamber of Commerce. In addition to that he is one of our most progressive citizens, who practices what he preaches, in reference to the mining industry, and we in turn wish him and his associates the abundant success that we believe they are destined to have from their present operations.

Mr. and Mrs. A. Martin who have been on a two mont's vacation in the Hawaaian Islands, returned to Los Angeles last Saturday night. They went over on the ship Monoa and returned on the Calawaii. It was a splendid vayage, the ocean being smooth both going and coming. They visited their son, Joseph Martin, who is a pathologist in the Experimental Station on the island. He leaves next Tuesday for Java, Japan, Australia and the Phillipine Islands on a 5 or6 months trip.

BRUSH CREEK MILL IS RUNNING TWO SHIFTS

The 10 stamp mill at the Brush Creek mine is running two shifts quite regularly since the recent storm and the abatement of the cold weather. The mill is handling up to 25 tons of rock a day on the double shift. While no sorting of the rock is used and no concentration the plates are showing good recoveries per ton milled.

Superintendent Lichtenberg is running two stopes on the 300 level to keep the mill going and is using the shrinkage method of stoping which is quite an economical method in handling the rock in that formation. There is enough ore blocked out at the present time to keep the mill in operation for some of the shaft will provide plenty of months and with additional sinking reserves for future use.

President Ben F. Ballard of the Kate Hardy Company which has the Brush Creek property under bond arrived in Nevada City Saturday afternoon on business connected with the property.

NEOCENE MILL HAS YEAR SUPPLY GRAVEL AHEAD

The new Ellis ball mill for handling cemented gravel is expected to reach Nevada City in the next week or ten days and will be installed at once at the plant of Neocene Gold Incorporated northwest of town. The excavating of the site for the mill is about completed and the lumber is on the ground for the erection of the mill building and ore bins.

Already practically enough auriferous gravel has been blocked out to keep the will in continuous production for a year ahead which is a remarkable showing. Had the former operators but crosscutted five feet to either side of the main drift or have run any raises they would have cut into the large areas of gravel that have been exposed by the present operators. It is rather astounding that the mine has not opened up years before and shown large production records and it has remained for the Neocene company to develop it into one of the most promising gravel properties in this section which ha sshown so much placer production in past years.

All the gravel both white and blue will be run through the mill in order to extract all the values and the tailings from the former workings will also be milled. The mill which is of the ball tpye will have a capacity of 50 to 75 tons a day. The main values so far determined seem to run in the concentrates and with concentrators used in the milling process but little values are expected to escape.

Drifting stoping, and crosscutting operations are being steadily prosecuted and quite a camp has been established at the property. An extra bunk house is being erected and the private road connecting with the county road at the Mooney corner is being put in excellent shape. With the work to be done by the county to that point will make it possible to handle supplies to the property in fine shape.

MOBLEY RETIRES

Walter L. Mobley who has been in charge of the grocery department of the Alpha Hardware and Supply Company for eight years past, has severed his connection with the firm and will take a rest from active business life in the hope of regaining his health which has not been of the best the past year. He has a valued member of the city board of trustees for terms, retiring last year. Walter is one of our best loved citizens.

Al McAllister and Tom Bigelow of North Columbia were in Nevada City Friday.

Supervisor Alex Robertson came over from Hobart Mills Saturday to be on hand for the special meeting of the board today.

Mrs. Clara Scarfe who has been indisposed for some time is reported as improving.

Thorn B. English was down from North Columbia for the weekend.

Homer Gouldl was down from Downieville on business Saturday.

PREBLE LOOKS FOR PROPERTIES IN THIS SECTION

A prominent mining man of the north country is now in Nevada City with the idea of bringing in large capital to invest if he can find suitable properties at prices and on terms that will justify him in going ahead. Edward P. Preble of Portland, Oregon, who is president of the Banaroff Mining Company of Sitka, Alaska, with Mrs. Preble is stopping at the National Hotel and will be pleased to hear from interested mining property owners who can show some real friend of Martin E. Olsen of the prospects.

Mr. Preble, who is a personal Yakima Mohawk Mining Company operating the Mohawk property south of town, is greatly impressed with the looks of this section from a mining standpoint and has been absorbing all the information that this office has on hand concerning the various properties that are open for development and he feels that it will be possible for him to hook up with several that the interests affiliated with him can develop on a large scale. He has been reveiving glowing reports of the growing activity in mines in this section of the coast and stated to a Nugget representative that he found the reports fully justified and that he was more than pleased at the outlook. His interests are prepared to spend large money in development on properties that offer good prospects of becoming producers.

Mr. Preble has been greatly interested in the showing being made by the Neocene interests north of town and is going to make a personal inspection of the property this week to get first hand information on the gravel possibilities of this section. Several quartz properties are already under inspection and will be checked up at once as Mr. Preble is anxious to get under way and commence operations.

ROAD SITUATION IS LOOKING EXCELLENT

Nevada County's road situation is looking for large improvement the coming two years due to the interest being taken in our problems by the state highway commission under State Department of Works Director Bert B. Meek .The meeting of the supervisors with the commission Thursday afternoon determined the fact that the commission will have the Nevada City-Downieville state highway in much better shape by the time the government has completed the Yuba Pass highway between Downieville and Sierra City in the coming two years.

The streteh between North San Juan and Camptonville which is probably the worst part of the route to Downieville will probably receive the first attention and doubtless much of it will be on new alignment to secure better gradients and less curves. It is expected that the hairpin turns will be gradually removed and the road brought to modern standards. Supervisor W. E. Miller of Sierraville was the principal speaker for the local group and he made a number of excellent points in favor of improving the road situation.

With the bids for the construction of the 12 mile stretch on the Tahoe Ukiah route east from Nevada City to be opened Wednesday at Sacramento, dirt should be flying on this stretch. With that completed it is probable that steps to complete the route into Bear Valley to a connection with the Victory Highway will be carried out by the commission.

Mr. and Mrs. Fred Breese are entertaining their daughter, Miss Natalie of San Francisco.

Mrs aWlter Waynflete came up from Sacramento Sunday to join Mr. Waynflete who has been handling matters connected with the issuance of the coming mining review to be issued by The Nugge the coming month.

EDITORIAL

The recent movement introduced for the purpose of adopting a state bird is one that should command the support of all loyal Californians.

It is very fitting that we have a state bird as well as a state flower. California which abounds in so many beautiful birds is particularly fitted to sponsor such a movement, and we may express the hope that other states will follow in our footsteps.

The method chosen to decide just which of the feathered tribe will be chosen to represent our state is especially commendable. It is an educational measure. The casting of ballots in the schools will encourage the students to familiarize themselves with the various species of bird life in California.

On Tuesday, March 12, the student body of the high school voted its opinion as to which bird it wanted to represent the state. The bird having the largest number of votes was the Valley Quail, the western bluebird came second.

HONOR SOCIETY PROGRAM

The Nevada City High School Chapter of the California Scholarship Federation presented a program on Friday 15 to the studentbody. The first number on the program was a dance by Nancy Jones and Alberta Baker. Then a one-act play entitled "Spreading the News" was presented. The cast of characters was as follows:

Mrs. Fallon	Nancy Jones
Mrs. Tarpey	Mary Jones
Mrs. Tully	Nadine Sutton
Jack Smith	Alberta Baker
Shawn Early	Elizabeth Thomas
Policeman	Betty Bettles
Magistrate	Kathlyn Greenway
Bartley Fallon	Curtis Roberts
Tom Casey	Addison Janes
James Ryan	Bill Jeffrey

The society also sold candy to the student body.

TRACK MEET

The Inter class track meet was held at 3:00 o'clock Wednesday March 13. The results were as follows:

Seniors	65	points
Juniors	27	"
Sophomores	8	"
Freshmen	4	"

John Solaro was high point man with 21½ points.

RECEIVED PIN

A gold pin was awarded recently to Vera Toccalini for typing sixty four words a minute. It is hoped that she will reach the seventy mark and receive a jeweled pin.

Subscribe for The Nugget

HEAR HALIBURTON

On Tuesday evening Mr. Pedersen, Byron Janes and Carroll Coughlan went to Sacramento to hear Richard Haliburton speak at the Masonic Auditorium. He is the author of "The Royal Road to Romance" and "The Glorious Adventure" which tell of his many travels in Europe and Asia. Mr. Haliburton told of his adventures in these countries. He is only twenty-eight years old, but is a very interesting speaker. They reports that the meeting was very interesting and entertaining.

JUNIOR MEETING

On Tuesday, March 12, the junior class held a meeting. The purpose of the meeting was to talk over plans for the junior prom.

Another meeting will be held in the near future to appoint committees, and take further steps towards the development of the prom.

The class this year hopes to put over the biggest and best prom ever.

FRESHMAN GATHERING

A freshmen gathering was held at 3:20 o'clock, March 12. The meeting was held for the purpose of finding out the financial standing of the class and, to elect a new secretary. The party cost thirty-three dollars. If all the freshmen will pay their dues we will have over a dollar in the treasury, after paying the bills.

Wilma Yost, the secretary, moved to Oakland, and Margaret White was elected for the office.

TENNIS COURT

At a recent meeting of the Board of Education it was decided that the work on our tennis court could be started.

The money that former school classes have donated to the school has at last been turned over to us for use on the tennis court.

The work can be commenced and it is hoped that the boys can cooperate in the preliminary work.

TALK ON FEEBLE-MINDED

Miss Hoffman, who has taken a course on feeble-mindedness in college, gave a short account of this course to the socialogy and English classes on Tuesday. Her talk dealt with the care and different stages of the feeble-minded.

JOKES

Nancy—"I wish I could be like the river!"

Buddy—"Like the river? In what way?"

Nancy—"Stay in bed and yet follow my course."

"George Washington," read Mr. Kjorlie, "was born on February 22, A. D.—" and then broke off with, "By the way, Bill, what is the meaning of A. D.?"

Bill Rector—"Please, sir, I'm not quite sure but I should think it means, after dark".

Mary Jones (talking to Olga while she was studying).—"Gee! Olga, I guess I'm bothering you."

Olga—"Oh, no that's alright, I'm not listening."

Ernie—"What causes my knife to pick up iron filings?"

Mr. Isencee—"It must be charged."

Ernie—"No it isn't. I paid for it".

Mr. Kjorlie—"Lena, can you explain yesterday's lesson?"

Lena—"I didn't get that far".

Mr. Pedersen (explaining the law of gravity)—"If I should stand on my head all the blood would run to it and make my face red".

Holden—"Why is it the blood doesn't go to your feet and make them red when you are standing?"

Noble—"His feet aren't empty, simp.

Mrs. S. C. Hieronimous is spending a few weeks visiting in San Francisco.

Mr. and Mrs. E. J. N. Ott attended the funeral of the late Wm. H. Dunlap in San Francisco.

County Assessor Schroeder visited in Sacramento Thursday.

NEVADA CHAPTER OFFICIATES

The officers of Nevada and Grass Valley Chapters of Royal Arch Masons conferred the august degree of Royal Arch on eight candidates of the new Roseville Chapter at Roseville Wednesday night. W. E. Meservey presided as High Priest, G. J. Davis as Scribe, J. F. Stenger as Principal Sojourner and A. A. Willoughby as Captain of the Host for Nevada Chapter; P. H. Oates as King, Ed Matteson as Royal Arch Captain, . A. Harris as Master of 3d Vail, Albert Thomasson as Master 2d Vail and George W. Zembsch as Master 1st Vail for Grass Valley Chapter. Nearly a hundred were in attendance at the meeting which was one of the largest in the district for some years. Others attending from this section were R. J. Benetts, Elmer Durbin and T. M. Harris.

Board of trustees of the Camptonville school district held a regular meeting Friday evening. The Board set Monday, March 11th as the date for the opening of school for the new term, and if the weather permits, school will open and run continuously from that date. The same teachers will fill their places at the opening, Miss Doris Nightingale, Mrs. J. P. Smart, and Mrs. Kate Hope Livingston.

J. M. Morris of Forrest visited relatives here recently and is now visiting in Sacramento.

Miss Frieda Hieronimous spent a week visiting relatives in Sacramento.

D. D. Smith of Truckee and J. M. Thomas of Floriston were called here Thursday to act as jurors in the Patrido case.

RAILROAD HEARING IS CONDUCTED PAST WEEK

The hearing of the protest of the Nevada County Railroad against permitting the Schneider Brothers truck line from operating between Auburn and Forest Springs has been conducted at Auburn and Grass Valley the past week by a representative of the state railroad commission which some time since granted the application which was the entering wedge into getting into the local field in competition with the railroad.

An interesting point brought out was that the truck company had been keeping tabs on the local merchants who had been trucking in their own stuff from below instead of using the railroad.

Mr. and Mrs. Frank Guenther are spending a short vacation around the bay. Mrs. Guenther has not felt so well lately and it was thought a change of climate would benefit her.

JIM STEWART WRITES OF EARLY PLACER MINING DAYS

(By James D. Stewart)

Continued from last week

The California Debris Commission received, as stated before, appropriations totaling $800,000 to build barriers to restrain the debris already in the stream from moving farther down stream where it would damage the navigable portion of the Sacramento river.

The commission decided to build a long, low dam near Daguerra Point on the Yuba river. It was necessary to build this on a great depth of tailings as it was impossible to reach bedrock. Although great ingeunity was used by the engineers in charge, they only proved that a dam must have a secure foundation in order to stick. The floor waters partially wrecked the structure and the money was lost.

Had this money been expended on a dam in the Narrows, it would not only have restrained the debris already in the stream, but would have provided the foundation for a greater structure behind which many of the hydraulic mines of this area could have operated.

The hydraulic miner is again to be criticized for not both asserting his rights in this matter and also cooperating with the commissioners.

The hydraulic miner also sat silently and permitted himself to be charged with all the debris in the streams; this is not true. The Sutter county agitator is eternally trying to prejudice the people of the Bay area by telling them that the hydraulic mines are filling up the bay. They make no mention of the more than 5,000,000 cubic yards of silt from natural erosion that finds its way down the Sacramento river to the bay every year. Farming operations, grazing on the steep sides of the Sierra's all contribute their quota and hydraulic mining gets all the blame. The hydraulic miner should have raised Cain at being charged with the whole bill.

This part of the article does not apply to W. W. Waggoner of Nevada City for he has worked overtime making investigations along this line and telling of his findings.

An example of the placer miner's laxity in fighting for his rights is reflected in his representatives in Congress on the Norbeck Bill, which would have stopped all placer mining in the national forests and hampered other forms of mining in that area. It blithely passed the Senate and when one of our citizens wrote Senator Johnson about it, he had never heard of it; however, thanks to our Congressmen Englebright and Arentz of Nevada, it was killed in the House. We were just lucky in having a mining engineer as our representative; that's all. If we paid more attention to such things our representatives in public places would take the tip.

These articles are not intended as lectures ,but an attempt to arouse the people in these hills to their rights to the point where they will fight for them.

A few days ago the "agin the government" portion of Sutter county population took some twenty of the Legislators to the Yuba City-Marysville area to view the vast damage done by the "hydraulic Vandals" of the 70's and 80's. They did not give the hydraulic miner any credit for the great stream of gold that came through the channels of trade and enriched a goodly portion of their population. They did not point to any damage done by hydraulic mining since 1920 because they could not. The Bullard's Bar Dam was built on the North Yuba River that year, and there are now eleven hydraulic mines operating behind it each winter. They did not show any damage from this sources and cannot, or they would stop the operations. They did not tell these legislators that it was mining such as this, behind the dam, that the hydraulic miner was now proposing and not the unrestricted hydraulic mining of the 70's and 80's.

They did not tell them that the stoppage of hydraulic mining caused the hydraulic miner a loss of over $100,000,000.00 which he has never recovered, and the total loss shown to farm lands totals only $2,597,535.00 much of which has since been recouped. This is their idea of fairness.

Some men are never able to keep step with progress and most of these men who pointed out to the legislators the damage done in the 70's and 80's are still living in that era and have never stepped forward and kept pace with progress. They are in a class with the self pitying invalid who takes pride in their misfortune and still walks on a crutch after the wound is healed.

I am wondering how many people are reading these articles. To those of you who are, and who know senators and assemblymen in other districts, or have friends who know them, I am asking that you write them to investigate this matter carefully, as embodied in the Seawell Bill No. 650, and if they can see the matter from our viewpoint to give us a lift. This will help mightily, for the bill is now out of the Mining Committee of the Assembly and in the thick of the fight.

Do not put this off, for now is the time.

(To Be Continued)

CAMPTONVILLE JOTTINGS

A party was given Saturday evening at the home of Mrs. M. G. Calvin by Mrs. Phyllis Riddell and Mrs. Tom Baldwin, of the Halkyard mine, in celebration of Mrs. Calvin's birthday. In spite of bad weather an abundance of wind and rain, three cars came down from the mine, to join in making the birthday this year a happy occasion.

The evening was enjoyably spent in playing games, cards, and dancing. A delicious supper was served at a late hour. Those in attendance were: Mr. and Mrs. Thomas Baldwin and son, Guy, Mr. and Mrs. Ben Hudelson and daughters, Ben-Dora and Ida Lou, Mr. and Mrs. M. G. Calvin, Miss Dorothy Hays, Mr. and Mrs. Leonard L. Bishop, Mrs. Phyllis Riddel and son, Minot, E. E. Stone, Wm. Burns, M. E. Whittum, Mr. Grindel, E. J. Humphrey, B. F. McNaught.

Henry Wayman of Marysville was in town Tuesday on a short business visit.

A traveling show played at the Masonic Hall Tuesday night; the weather was so cold that only a few people turned out.

Mrs. Claude J. Thompson went to Nevada City Monday on a short business visit.

Mrs. Lester M. Jaynes of Nevada City spent a few days this week visiting relatives in this section.

Supervisors Ben L. Hames of Sierra City and Andrew J. Modglin of Portwine, passed through town Tuesday enroute to Sacramento to attend the supervisors meeting held there.

Peter Peterson returned Monday from Marysville where he spent the past few weeks visiting relatives.

W. S. Godfrey returned to his home at Pike City Tuesday after a brief visit with delatives at Galena Hill.

Mr. and Mrs. William O. Grant returned Monday from a short visit with relatives at Oroville.

Mrs. Phyllis Riddell left Sunday for Modesto on a short visit with friends.

Edward Lang arrived Sunday from Sacramento and will remain here with his brother, William, at the Lang Garage.

Mr. and Mrs. Ben Hudelson left Sunday for their home at Modesto after a short visit to her mother, Mrs. aldwin, at the Halkyard mine.

Emmett Costello Nevada City paper hanger and painter, returned to his home Monday after doing some paper hanging for Mrs. Fred Hanson.

Frank Bobb, Nathanial Thompson and son, Nafe Thompson, of Sweetland were in town Monday on a short business visit.

James P. Coughlan of North Columbia was in Nevada City Monday.

"The woman is biped built like a man; let dress like a man".—George Bernard Shaw. George must be losing his eyesight.

Artistic temperament is what you get after you are too old to be spanked.

To quote from a popular song, the stock market every once in awhile has a tendency to "faw down and go boom".

Paris announces that the dresses of the women this spring will be bright colored. No doubt that is so that we can see them.

SAVING OPENS THE DOOR TO HAPPINESS

People who idle away their time are never happy. Most of the discontent in this country is fostered by the lazy men who do no work but who criticise honest effort. They have the key to the poorhouse door in their pocket, although they may not know it. Eventually thew may have occasion to use it.

Thrift and industry on the other hand make people happy These are the keys to riches, although the path may be long and progress may be slow. A savings account really does open the door to happiness, and all the time that you help it grow you are getting an unconscious pleasure that helps to keep you satisfied.

If you are not among our large family of people who enjoy the thrill that savings brings, the opportunity is yours merely by taking advantage of it. In these days it isn't difficult to open an account. Even a dollar deposited in good faith with a desire to increase it reguarly is welcomed at this bank.

CONSTRUCTION TURPENTINE PLANT IS GETTING UNDER WAY THIS WEEK

With the actual commencement of work on Nevada City's big turpentine production plant this week, things will be actively shaping themselves for one of the largest industries to locate in this county in many years aside from gold mining. The slackening in the cold weather has also made it possible to start hanging the many thousands of cups for gathering the sap from the trees as they are tapped.

The plans for the factory which is to be erected within the city limits near the railroad trestle, were received the past few days and construction is commencing. The office building is already practically complete and the large building to house the factory is the next unit to be put up. The large concrete storage vat has been completed and is ready for holding the gum as it is brought in. The special equipment for converting the gum into turpentine and many by products has been held up by various delays and will not leave Europe for Nevada City for another month yet at least. This will not hinder operations in the tapping of trees and collecting of the gum in the mean time as storage facilities are ample for some months. The plant will present a scene of great activity when it is finally under way.

It is less than a year when Mr. F. C. Ernst started signing up timber acreage in this section to make the plant possible and he now has many thousand acres signed up for production. Up to a half million cups will be hung as the industry gets fully under way which means that a vast amount of money will be loosed into local marts of trade through payments to timber owners and the hiring of several hundred employees to harvest the gum. Nevada City and Nevada county are indeed fortunate to secure an industry of such major importance and utilizing one of our natural resources hitherto going to waste as far as mankind's uses are concerned.

The site for the factory was cleared last fall and is readily accessible from the railroad and the highway. The city trustees cut in a new street and the railroad company which will have a large tonnage to handle will install a spur track as soon as necessary. The factory proper, a three truck garage, the store office building with [illegible] units to be constructed [illegible] others will be added as needed. There is ample space on the site for loading and unloading operations when the plant is under way and ample room for expansion.

The bulletin printed on this page is a copy of one sent out by the company to timber owners and employes giving careful instructions as to tapping operations and preparation of timber tracts. The work regarding fire prevention is of especial interest. It is worth a careful perusal.

SECOND SHIFT ADDED IN THE VIRGINIA MINE

In spite of a double compartment winze going down in which there is considerable waste ore taken out, a second shift has had to be added part of the time at the mill of the Virginia Mine, near Coulterville, owned by the Nevada Hills Mining Company, according to Frederick B. Hyder, consulting engineer. The winze is off the 900-foot level and started at the 1050 level when a new electric hoist and pump were installed. Since then two shifts have been making three feet a day in much better ore than has been found in the past.

The present tonnage at the mill is coming from development alone. The ore is widening out and getting richer with depth. At present the winze is 60 feet below the 1050 level. On this latter level the ore was followed south of the winze for 80 feet. Across the winze on this same level the ore continues although only a few feet of work was done. Depth is placing in sight considerable ore.

Method of Tapping Trees to Securing of Gum
Notice the Large Amount of Exposed Surface

BULLETIN

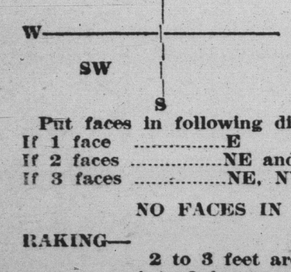

FEBRUARY, 1929

BARKING—(Trimming away thick bark)
The sapwood must not be exposed.
Trim 4 Feet high
6 inches of bark must be left untouched between faces.
Trim off all low or dead limbs.

SIZE OF TREES—
Select trees with healthy tops, without burned butts.
10 inches to 14 inches inclusive, get one face (breast high)
15 inches to 19 inches inclusive, get 2 faces (breast high)..
20 inches to 36 inches inclusive, get 3 faces (breast high)..
36 inches up, if very thrifty, get 4 faces.

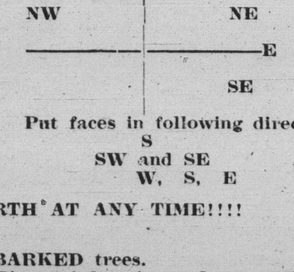

SIDES OF FACES—
Faces must be made on the following sides if tracts or parts of tracts, slopes or valleys are exposed:

If exposed toward
South
South West
West
Hot Locations

Put faces in following direction
If 1 face .....E
If 2 faces .....NE and NW
If 3 faces .....NE, NW, SE

If exposed toward
North, North West, North East
East, South East,
Cold or Wet Places
(Creek Beds)

Put faces in following direction
S
SW and SE
W, S, E

NO FACES IN THE NORTH AT ANY TIME!!!!

RAKING—
2 to 3 feet around all BARKED trees.
1 to 2 feet around good Pines of 6 in. and up, or large Cedars, Oaks or Firs, etc.
Clear all wood roads of needles.

FIRETRAILS—RAKE OR HOE (in Tarweed,) along wood roads, the edges of county roads, Canyons or Creeks, around Heavy Brush Sections.

BURN ONLY with permission and or under supervision of the local Forest Ranger or Fire Warden, or representative of this Company.

NO BURNING until all tracts are raked.

CHIPPING—(Cutting of incisions to create running of gum.)
Wide—7 inches.
High—¼ inch.
Deep—⅛ inch.
Total Height of face in one year not to exceed 16 inches

!!!!DO NOT RUN YOUR FINGER ACROSS CUT AFTER CHIPPING. IT STOPS THE FLOW OF GUM!!!!

CHIPPING takes place as follows:
March to April 30, every 7 days (6 times)
May 1st to September 30, every 5 days (30 times)
October 1st to December, every 7 days (8 times) :—44 times
Chippers must exchange cups almost full with cups on less thriftty trees.

DIPPING—(Collecting of Gum)
Every 15 days; (can be done every 5 days, but Gum must not be left in cups more than 20 days.)

SMOKING—No Smoking Allowed After March 30th.

WORK STARTED VALLECITO CENTRAL GRAVEL PROPERTY

For the purpose of starting work on the ailecito Central property, recently taken over by the Old Gold Extension Mining Company, Superintendent Robert Mack has gone to Vallecito, accompanied by A. C. Kerley, former owner. A crew will be put to work at once repairing the shaft and putting in foundations for electric hoist, pump, compressor and other equipment. The Vallecito Central is in the heart of and surrounded by properties held by the Vallecito Western Mines Company, which has caused considerable excitement in its operations between Angels and Coyote creeks. It consists of 60 acres of patented ground on which there is a 225 foot incline shaft. It is expected this will have to be extended from 60 to 75 feet more to reach the gravel.

The vertical distance from the surface to the old river bed is estimated at 160 feet, where it is estimated to be from nine to 12 feet thick, carrying $5 to $15 a cubic yard.

Vallecito Western workings have been extended to within a mile of the Old Gold ground. A short distance away, on the Manuel Ranch and the Dopt property, drillink is being done to find the channel, while further up the creek the Douglas Flat property is preparing for work. The opeations of the Butte Mining company are but a short distance from the Old Gold Extension.

In a letter recently sent stockholders President Charles Fairchild says he expects to shortly have the property in excellent shape. The stock of the company is listed on the San Francisco Mining Exchange.

New Method of Tapping Showing Small Area Exposed
This Does Not Produce as Much Gum Per Year but the Tree Remains Undamaged

How to Get Lost

A pompous elderly man, visiting a certain rural district, wished to inspect some ruins in the neighborhood He inquired for the oldest inhabitant, and assailed him with such a host of needless interrogations that the ancient personage presently lost his temper, and said:

"I'll tell thee a better way yet. Go straight down yonder, take fust turning through a tater field, past the Blue Boar, up Mileston hill, and over the common till you come to the Windy wood; go down till you get into the middle of that 'ere wood, and then——"

"Well, and what then?" demanded the old gentleman.

"Then," said the oldest inhabitant, "I'm blowed if you won't be properly lost!"—London Tit-Bits.

Grounds for Suspicion

"Look there!" said the washing machine agent who visited the hamlet sufficiently often to be fairly well acquainted there. "See those men and boys—yes, and women, too—pointing at Uncle Skinner and grinning after he has passed by. What is tickling them?"

"Old Skinner is a widower," responded the landlord of the taven at Squam. "He is also as stingy as stone soup, but they've found out that while he was up to the city last week he went to a beautie shoppe and paid a whole dollar to get manicured. And they are kinder putting two and two together and making twenty-two of it."—Kansas City Star.

Gratitude

Missionaries are accustomed to receive some strange letters from natives. Here is a letter of gratitude which arrived a short time ago at a well-known medical mission hospital in India:

Dear and Fair Madam,—I have much pleasure to inform you that my dearly unfortunate wife will no longer be under your care, she having left this world for the next on the night of the 27th ult. For your help in this matter I shall ever remain grateful.—Yours reverently."

FRENCH CORRAL ITEMS

FRENCH CORRAL, March 16, (Special to The Nugget)— French Corral the beautiful! Yes, growing in beauty every day now, since all vegetation has been started by the wonderful rain of a week ago, when the dreaded "dry spell" was thoroughly broken. My! how the rain did pour and gladden many hearts!

The only trouble we know of was where some road work was being done and traffic was inconvenienced for a short while.

Our little community was thrown into consternation last Saturday morning when our postmistress, Mrs. W. E. Moulton, was shot in the leg, by a pistol which was accidentally discharged by falling to the floor. The ball entered about ten inches above the knee and ranged upward to the tip of the spine. She was immediately hurried to the Nevada City Sanitarium, where under the care of Dr. Werner, the ball was removed, and we are happy to say she is rapidly recovering.

We realized that morning what a splendid service the telephone is. Mrs. Moulton's daughter, Louise, had left with friends for a trip to Nevada City just a few minutes before the accident and by our phone service she was stopped on the way and returned in a short time to take her mother for medical aid. By the way that reminds us that French Corral claims the distinction of having had the first long distance Bell Telephone line that was ever built and operated successfully The main battery was in French Corral and the line extended to Eureka and Lake Faucherie, a distance of sixty or eighty miles. It was built in "76" or, "77" and was known as the Ridge line. The first poles of the line are many of them standing yet. Arch B. Bell was the first lineman.

Mrs. E. Sutherland and her daughter, Barbara accompanied Mrs. W. E. Moulton and daughter, Louise to Nevada City Saturday.

W. P. Clerkin and Joe Swazey returned from Pike City Saturday.

Bill McCullough was a French Corral visitor Sunday.

Miss Frances Moulton came from Sacramento Saturday and returned to that place Sunday eve.

Supervisor Joseph Frank was a visitor Tuesday.

E. R. Durfee of Gridley made a business trip to this place Wednesday.

W. E. Moulton made a trip to Nevada City Wednesday.

A crew of men started repair work on the Pine Grove reservoir Thursday and hope to finish in a few days.

St. Patrick's Day will soon be here and from the "ads." in our county papers it will be duly celebrated by dances.

Famous Astronomer

Hipparchus, the Greek astronomer, who lived more than 2,000 years ago, long before any of the modern astronomical instruments had been invented, deserves much credit for his accomplishments, says the Kansas City Star.

He catalogued 1,080 of the stars; fixed lattitude and longitude; determined the length of the year, the obliquity of the ecliptic, that is, the inclination of the earth's equator to the plane of revolution about the sun; the eccentricity of the earth's orbit, how far it is from being circular; measured the distance of the moon, roughly, and discovered the precision of the equinoxes, that the sun's place among the stars at times of equal day and night constantly tends eastward. This last discovery of Hipparchus waited 2,000 years for its explanation.

Thirteen at Table

The origin of the superstition about the unluckiness of the thirteenth person at a table is so old as to be unknown. Thirteen, from earliest times, has been a number with mystic associations—like three and seven.

Rev. E. Cobham Brewer's "Dictionary of Phrase and Fable" records that: "It is said that the origin of sitting down thirteen at dinner being deemed unlucky is because, at a banquet in Valhalla, Loki once intruded, making thirteen guests, and Balder was slain.

"In Christian countries the superstition was confirmed by the Last Supper of Christ and the twelve apostles, but the superstition itself is much anterior to Christianity."

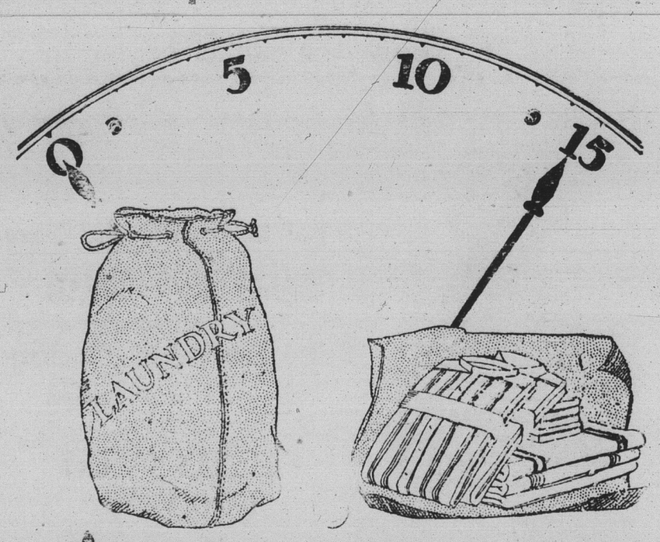

Clinking Glasses

The habit of clinking wine glasses or tumblers together, and the attendant wish of "good health," originated in the days of the Roman gladiators. It was the custom before two gladiators met in combat, for each of them to drink a glass of wine, supplied by a friend of either of them. So that no attempts would be made to poison either of the combatants, the wine was poured from one glass to another until the wines were well mixed. Later, when poisoning became a thing of the past, this custom was reduced to the mere clinking together of the glasses to denote friendship.

SIERRA COUNTY MINING

We have received authentic news that an electric power line will be constructed within the next three months to carry juice from the P. G. & E. line at the Wisconsin mine to the Bessler mine at Downieville. The Mutual Security Co. of Oakland have the Bessler under bond, and have lately purchased all the rights of the Golden Key Mining Company, who previously had the property bonded. An incline is being put down at the Bessler and more power will be needed to hoist and pump before long. This incline is now down 80 feet ,and very good progress is being made by the three men who are working. Port of the hoist broke early this week, and the men cut timbers until the necessary repairs could be made. The Mutual Security Company are also opening up the Austin Mine at Whitlock, Mariposa county. A. D. Frumento is in charge of all the work for the Mutual Security Co.

Another lot of air pipe was delivered at the Finney Mine in Downieville by H. J. Gould during the week. J. H. Collier, manager for the Gruss Mining Co., who are developing this property, was here inspecting the work last week and expressed himself as being more than satisfied with the splendid showing. The main tunnel is in 1100 feet, running south on the vein, with a raise up 75 feet and a winze down 11 feet below the floor of the tunnel. Both raise and winze are in ore from 18 to 24 inches wide, which assays from $24.00 to $50.00 a ton, and the quartz in the winze shows free gold. The foot wall swung to the west from the main tunnel a short distance back of the present face of the tunnel but has now come back to its natural place again. In the face at this time there is a streak of ore showing free gold on both hanging and foot wall, with three feet of quartz, mariposite and ledge matter which all pans gold in between. There is over 600 feet of backs, and no reason why the ore should not go to the surface. Take it all the way through there is a better showing at the Finney Mine right now than any property in this district, except the City of Six.— The Mountain Messenger.

A Washday *only* 15 *minutes long-*

INSTEAD of being a drudging task all day long, your washday need last only 15 minutes; half of that time spent in gathering the clothes and linens, the other half devoted to putting them away after they have been returned to you fresh, clean, neatly ironed, ready to use.

ENGELBRIGHT MAKES FINE SHOWING ON BEHALF OF THE MINING INDUSTRY

The many matters that Congressman Harry L. Englebright has undertaken and accomplished for the Second Congressional District which he so ably represents at Washington, in the session of Congress just closed, are of such moment that The Nugget is happy to be able to secure from its Washington correspondent at its request a summary of some of the high lights of our distinguished representative's activities.

Last year in a speech in the House, he called the attention of Congress to the inadequacy of the Federal appropriations made for the advancement of the Mining industry and this year in his activities before the Appropriations Committee of the House ,got results for several of the items. For the Topographical Survey, the department that makes the maps upon which the geological maps are based, he obtained an increase in appropriations of $130,000. Appropriations last year for this work were $505,000, and with the increase will make available $635,000. The increased appropriation will greatly facilitate the work of the department and enable them to make surveys in many of the mining sections of California that they heretofore have been unable to investigate. For steam gauge work of the geological survey, he has obtained an increase of $28,000. For the printing of geological bulletins, he obtained an increase of $30,000, which will enable the department to publish many of the reports that have been on file for two or three years back. Among the list of bulletins that this additional appropriation will enable to be published, will be the reports on the investigations of the ore bodies of the Mother Lode Section of California, and the Alleghany District in Sierra county. The geological survey bulletins are very valuable to the gold mining industry of California. Due to a lack of funds, the department has been some two or three years behind in its printing. With the additional appropriation ,t will enable them to almost bring this feautre of their work up to date.

Last year there was an appropriation of mineral mining investigations by the Bureau of Mines and this year he was able to obtain an increase in appropriations of $19,220. The $19,220 is to be used for the purpose of the study of mining methods and costs of operations. This will be a new work that the Bureau of Mines is undertaking and it is most important at the present time to the gold mining industry. Out of this money some investigations will also be made regarding geophysical methods of prospecting for ore.

Mr. Englebright has a bill pending, H. R. 17124, to authorize the issuance of patents for lands containing gold-bearing gravels at depth, which are overlaid by volcanic lavas, in which locations the actual existence of gold-bearing gravels can be demonstrated only through deep shafts, may be passed to patent upon evidence satisfactory to the Secretary of the Interior of the mineral character of the land without the requirement that applicants show an actual discovery of mineral upon or within the limits of their claim or claims. This bill is to take care of a situation that arises in many portions of the gravel regions of northern California where the old river channel may be covered at depth by lava and the prospector or mineral application be unable to show on the surface an actual point of discovery. A great deal of trouble has been caused to the mine owner for if his mining patent was protected, on many occasions he has been unable to obtain patent although the proof might be conclusive that the gravel channel existed in the ground.

His bill to exempt from taxation incomes derived from the mining of gold is before a committee of the treasury department and is being carefully considered and has much support in the department for a favorable recommendation.

Recently, Senator Norbeck of South Dakota introduced a bill to only give title in mineral patent to the mineral contents of the ground. —in other words, not giving any surface rights to the miner or prospector, such as timber or water. This bill was up before the Committee on Public Lands of the House, of which he is a member. He put up a fight against having the same considered, with the result that the bill was finally withdrawn and will die at this session of Congress. You can fully realize the effect that a measure of this kind would have upon a prospector and small miner, as in most instances the surface rights of his claim, such as timber and water make possible the success of his undertaking. The passage of the Norbeck Bill, he is confident, would strike a death blow to prospecting and this in turn would tremendously curtail the mineral development of the country It is to the prospector, having as his chief asset his two hands and a small grub stake, that all of the important mines of the country owe their origin. The American mining industry today owes its commanding position to the prospector with a pack on his back and a pick and shovel.

At the last session of Congress, he obtained a report from the California Debris Commission on certain phases of the hydraulic mining situation, and during the coming summer the commission is to make further studies on the subject.

Of the $7,500,000 appropriated this year for forest highways, California received an allotment of $632,000. Of this amount, he obtained for the Second Congressional District, $391,000. Considering the demands from other sections of the state, it is felt that his efforts were well rewarded for the fight he put up for the funds.

We are fully aware of the conditions that prevail each season in California regarding forest fires. It is felt that positive action must be taken for the relief from the annual fire menace and protection of our national forests, and he has introduced a bill providing for an appropriation of $4,500,000, for the fiscal years, 1931, 1932, 1933 and thereafter $4,000,000 annually, for the purpose of constructing and maintaining fire lanes, telephone lines, lookout houses, roads and trails, for fire prevention purposes. The bill is receiving very wide support from all over the country, and in the near future, a conference will be held by representatives from eleven western states for the purpose of advancing the measure.

Large areas of timber are being destroyed in California each year through losses caused by the pine beetle and it is estimated that in southern Oregon and northern California, the lumber loss at $10.00 per thousand board feet exceeds $150,000,000. In the hearings before the Appropriations Committee before the House, Mr. Englebright made a request that an appropriation of $50,000 be made for the investigation and eradacation of this menace; also that an appropriation of $20,000 be given to the California Forestry Experimental Station at Berkeley. These amounts were placed in the Agricultural Appropriation Bill in the Senate.

He also received an allocation of $25,000 from the agricultural funds for investigations relating to handling transportation of fruits and vegetables from California. Northern California ships many thousands of cars of fruit each year, which are hauled an average distance of about 2700 miles to the market centers. A large percentage of freight claim payments on fruits and vegetables are due to faulty refrigeration. It is probable that methods of pre-cooling cars in handling the products and changes in methods of icing and loading could be made which would assure better delivery at the market and cheaper service. It is of the utmost importance to the fruit industry of northern California that these problems should be investigated. The purpose of appropriation is the determination of the exact transportation and refrigeration practice which will best conserve the products and assure delivery at distance in sound condition, at the minimum cost of refrigeration.

In the Interior Department Appropriation Bill, he was able to have an amendment passed providing for $2,750,000 for the purchase of private holdings within the National Parks. These funds will enable the purchase of fine stands of timber that are held in private holdings in Yosemite National Park, and the Lassen Volcanic National Park, over which there has been so much concern during the past few years.

Recently, a bill providing $10,000,000 for additional hospitals for the World War Veterans was introduced and was unable to be passed out of committee. The survey recently made by the Rehabilitation Commission of the California Department of the American Legion, demonstrated that while California had in the World War approximately three percent of those under arms, we had within our borders on the 31st day of October, 1928, .2 per cent of those being hospitalized in the entire United States. The larger number in California is due to our climatic conditions and thousands of ex-service men going to California to recover their health.

At this session of Congress, he was placed on the Census Committee of the House, which had under consideration the reapportionment bill, which is based upon the 1930 census. California will receive six additional members of Congress. This bill has been pending before Congress for six years and has been acted upon several times in the House. Mr. was requested to assist in perfecting an organization on the floor of the House and the bill was passed.

At the last session of Congress Mr. Englebright made a strenous fight for additional funds for the protection of the cattle and sheep industry from the depredations of predatory animals and had a bill providing for $75,000 for eradication work in the state of California. At the same time he took the matter up with the Secretary of Agriculture and the Biological Survey. This year the department recommended that the annual appropriations be increased from $566,634 to $1,378,700 a year for the next ten years for predatory animal control work in the state. Predatory animals and rodents destroy millions of dollars worth of live stock, game and forage annually. The federal lands in the West, comprise as high as 84 per cent of certain counties and states. This land is not taxable and therefore, funds for predatory animal control work by the counties and states comprising these areas are not available. The federal government owning these lands should prevent the breeding and spreading of predatory animals to other sections.

Mr. Englebright is a member of the following committees: Mines and Mining, Public Lands, Patents, Indian Affairs, Territories, Census, the meetings of which occupy practically every morning of the week.

PERSONAL MENTION

Dr. J. R. Ivey has installed a new Harvard Unit in his dental office. It is the latest and most modernly equipped. He plans to remodel his office and finish it all in white

James Sweeney of Alleghany came in on the Citizens Auto Stage Monday and is visiting here.

Mr. and Mrs. Bain Crawford and Tom Bartsch came down from North San Juan for a few hours last Thursday.

Mrs. Wm. Schwartz and Mrs. Alice Adams of Grass Valley were Nevada City visitors Friday.

Nevada City Elks who attended Elks Lodge in Marysville Friday evening were, Exalted Ruler T. W. Richards, Francis Hogan, J. F. Colley, E. W. Schmidt, J. J. Fortier, James Penrose, J. P. Muscardini, Joe Huy, Gus Orzalli, V. V. Foley, E. J. Kilroy, and J. W. O'Neill.

Among those attending the N. S. G. W. who attended the Past Presidents Association in Auburn were, C. W. Chapman, Muller Chapman, E. J. Miller, Miles Coughlin, R. L. P. Bigelow, Eddy Powell, George Neagle and Sam Polglase.

Rev. Fr. McGary of Maxwell was a visitor in Nevada City with Rev. Fr. O'Reilly and a number of friends

SPECIAL VISIT WAS MADE AT SMARTVILLE

SMARTVILLE, Mar. 16, (Special to The Nugget)—A delightful evening was enjoyed by members and visitors of Smartville Chapter, No. 431, Order Eastern Star, at its stated meeting last Wednesday evening at which time Mrs. Aurelia Colling paid her official visit to the home chapter. The ritualistic work of the order was exemplified for

DOWNIEVILLE NEWS

Warren Godfrey was here from Pike Wednesday, and went up to Chapparel Hill Thursday morning.

Marion Lusk took A. A. Meyer to Sacramento Wednesday morning, where he expects to visit relatives for a few days.

Mrs. Frank Groves of Camptonville came in on Monday's stage auto, visited Mrs. Dugan that night and went to Sierra City Tuesday to visit Mrs. Ben Hames.

Angelo Reboli and Ed Appolini are busy clearing and leveling the east part of the lot belonging to the Downieville school district. The lot lies back of the Ponta hotel, and is quite large. When the work is completed it is figured the play ground will be enlarged probably 75X100 feet.

James Dugan went to the Scott ranch in Browns Valley after a truck load of beef cattle Sunday.

Sheriff Bynon had business in Alleghany last Friday and Saturday.

It has come to our ears that C. H. Nash found a silver fox lying dead on a ditch in Jim Crow canyon when he was here from Tulare county a week ago, There was not a mark on the body of the fox and no signs that he had made the silghtest struggle, so it is supposed the fox found one of the pieces of meat left by the dog poisoner. Mr. Nash skinned the animal and got a fine, prime fur.

Supervisors Hames and Modglin left for Sacramento Tuesday morning to attend the supervisors' convention, which met on Wednesday.

From allaccounts a dog poisoner is again getting in his despicable work, as several different people have lost dogs during the past couple of weeks. Death seems to come almost instantly after the dog gets the dose, which leads to the conclusion that cyanide is the poison used.

(The Messenger)

Mrs. Colling after which she addressed the chapter. Mrs. Colling said she was pleased with the earnest efforts put forth by her chapter in her behalf, also that it made her very happy to observe the manifestations of love and appreciation shown her by the officers and members. Mrs. Elsie Schwartz, in her sweet and pleasing way, presented Mrs. Colling with a beautiful gift, on behalf of the chapter, assuring Mrs. Colling that she had always been the guiding star of the chapter; was its first worthy marton, and of the pride and love of its members in greeting her as our Deputy Grand Matron. Mrs. Colling answered in her earnest, gracious way, thanking the chapter for the gifts, also for the beautiful flowers presented to her while being escorted to the East. At the close of the meeting visitors and members adjourned to the banquet hall to enjoy a sumptuous turkey supper.

Mr. and Mrs. Fred Boeken of San Francisco visited the latter's sister, Mrs. W. J. Beasley.

Mrs. John Murphy who has been in Marysville the past week, receiving treatment for a serious illness, is rapidly recovering and expects to return to her home within the next two weeks.

Mrs. Bertha Gassoway has recovered from an attack of the flu.

James K. O'Brien and sister, Miss Agnes, have returned to San Francisco after attending the funeral of Sister Columban at Grass Valley.

Mr. and Mrs. J. Bach were visitors in Grass Valley last Wednesday.

Miss Retha Downey visited delatives at Grass Valley last Wednesday.

THE NUGGET INDOOR SPORT COLUMN

CELIOS CONTINUE IN THE TOURNAMENT LEADING

The past week brought out the fact that the various teams striving in the Elks bowling tournament to dislodge the Celios from the top rung have rather a hard task. The Kopp Tea Biscuit Moulders essayed the task and started like a world's serious crew with an 844 for their first game but they used up most of their energy that session and the Celios annexed the next two easily and nearly copped total pins.

The Richards Cleaver Wielders by taking three points from the Scheemer Cellar Champs are within one point of third place. The Goyne Boiler Makers or the Richards have an outside chance to finish in the money in the closing round this week.

The final round finds the Celio and Nickless crews fighting it out for first place tonight. The Celios by taking two points or better can easily hold the lead and by taking one point will hold a tie. The present tournament shows the teams to be well lined up for competion and if the Goynes had lived up to early expectations they would have given the field a hard tussle.

The bowling the past week was much better than the previous week those strikes being registered than any week of the tournament. Willoughby rang up 17, including six in a row, three triples and a double. His average went up two pins to 172.Hegarty put out three doubles while Ghidotti went on a hitting spree and put over a triple and two doubles and boosted his average nicely. Tamblyn showed a bad reversal of form from his recent shooting and could only show a 140 average last week with the result that his 162 average tumbled to 160. He continues in second place however in the individual averages. High individual scores for the wek were Willoughby 562, Hogan 496, Nickless 484, Hegarty 483, Ghidotti 480 and Curnow 478.

In the strike and spare column Curnow was the first to break into the century class with 102 of the perfect second pin shots while Bigelow just broke the 100 mark. Tamblyn and Nickless are tied at 95. Percy Carr has 91, Breese 89, Fouyer 84 and Fortier 83. In strikes the field is badly scattered with Tamblyn in second place with 82. Curnow is in third with 74. Others showing form are Fouyer 62, Nickless, Bigelow, Mobley, Hogan, Percy Carr and Leiter with 58 each.

Another tournament of some kind is scheduled to follow the present one but details are lacking. The committee proposes to run one more round of the present tournament. The talk of challenging Grass Valley is growing in volume and it is to be hoped that it can be put over and determine the relative merits of the two lodges in bowling efficiency. A lot of interest is being manifested in the proposed inter lodge affair.

In the closing week ,the Celio and Nickless outfits tangle tonight in a thrilling battle for first place honors. The Celios go into the fray with a slender two point margin but the Nickless Staffs of Life are out for blood. Tomorrow night the Goynes and Richards hook up in a fight for fourth place. Wednesday night sees the closing chapter of the tournament with the Scheemers crew endeavoring to climb out of the cellar at the Kopp expense.

DOUBLES—D. Richards, P. Carr Fouyer, Hoge, Hogan, Leiter, Nickless, Curnow 2, Penrose, T. Richards, Goyne 2, B. Carr, Tamblyn 2 Lobdell, Willoughby, Bigelow 2 Pierce 2, Hegarty 3, Ghidotti 2.

TRIPLES—P. Carr, Fouyer, Hogan, Leiter, Nickless, T. Richards Bettles, Celio, Willoughby 3, Ghidotti.

QUADRUPLE—Kopp.

SEXTUPLE—Willoughby.

Nothing is easier than fault-finding; no talent, no self-denial, no brains, no character are required to set up in the grumbling business.

Six feet have awaited many a driver who wouldn't give an inch.

Nevada City to Sacramento and return, sold every day, limit 14 day $4.50; from Grass Valley, $4.00.

VOLLMAR WAS TOO FAST FOR SAN DIEGO OPPONENT

Whatever may have been the cause of a fight last November 24 between B. L. Conover of San Diego and Fred Vollmar, Jr., Silver Peak mining man, the result was disastrous to the man from "sunny California", if belief is placed in a complaint filed in the district court of Esmeralda county in which Conover seeks to recover damages of $5000, plus $1905 for sundry expenses and incapacity for three months. The scrap was pulled off at the Charity ball of the Elks in Goldfield, Conover says, and Voilmar, from the allegations, must have been a fast and hard worker. Besides 'several violent blows on the head, face and body," he is accused of kicking Conover in the right leg and breaking it. Vollmar's attorney, Ryland G. Taylor of Tonopah, has filed a demurrer to the complaint, presumably alleging that it does not state sufficient facts for cause of action. —Nevada Mining Press.

(Vollmar was in Nevada City several times last year on mining business and is president of a company that had the Yellow Metal property at Lake Bowman undner bond)

ORNAMENTAL STONE

D. W. Lee, mining man of Yanke Jims, was in Auburn this week. He was exhibiting some cut specimens of ornamental stone, a combination of rhodonite and rhodizite, found in a manganese formation in kidneys. This stone is known to have been found in but two other places in the world: in the Ural mountains of Russian and on the west coast of South America. It sells to Tiffany & Co. of New York and Shreve & Co. of San Francisco for $8.00 per pound. It is very hard, polishes beautifully, and is appropriate for jewelry settings. While here Mr. Lee showed us a piece of the rough stone which also contained some sort of crystal, which sparkled like a diamond. It is embedded in the rock and cannot be detached without difficulty.—Placer Herald.

FROM OUR READERS

Mr. Willoughby:—

Enclosed you will find an order to pay The Nugget. As both my husband and I are natives of North San Juan, we of course enjoy the paper. My husband's health was very poor in Oakland so I moved down here.. I wonder how you found my address down here. I am sure glad as we only missed 2 or 3 papers.

Mrs. L. F. Dahneke.

Dan Dovovan of North San Juan was a visitor here early in the week.

One thing that seems to grow luxuriantly without the aid of any fertilizer is a deficit.

A NEW TREND IN ORE DRESSING FOUND

Crushing is the most costly step in all ore-dressing processes, observes the Department of Commerce. It is done in order to free the minerals comprising the ore from each other and to produce grains of a size within the recovering power of the process to be used. Costly fine grinding has heretofore been considered essential to flotation. Since there is considerable loss in the slimes produced in such crushing, coarse sand flotation is being studied at the Moscow, Idaho, field station of the United States Bureau of Mines as a possible means of effecting economy. There are two main reasons why coarse flotation has been thought to hold little promise: First, there is a limit to the size of grains that flotation will lift. This limit is not exactly known, but has often been placed at 65 mesh. Coarser grains will float under favorable conditions. A second reason for favoring fine grinding is the difficulty of circulating coarse sand. The gravity-flow type of machine has overcome this objection. There is no need to float the largest mineral grains in a coarsely crushed pulp. They are ordinarily best recovered by gravity concentration.

The coarse sand flotation problem has been colved in the Michigan copper district. It embodies flotation of coarse sand followed by classification and table concentration. Flotation removes fine and intermediate size mineral grains; the classifier overflow is tailing; the table recovers coarse mineral and middling, and rejects coarse tailing. A great metallurgical and economic advantage has been gained by this process, Experiments indicate that it applies equally effectively to ores of many other districts.

This process does not require flotation to recover unduly large mineral grains, not tables to save the slime and fine mineral too small to feet the influence of gravity, nor does it require a classifier to completely deslime. The classifier functions onl as a tailing-maker.

Supervisor R. A. Eddy attended the supervisors convention which was held in Sacramento the latter parto f the week.

Isn't it funny that every time they figure out something new to reconstruct Europe they always end up by wanting to sell Uncle Sam a few million bonds?

"War", says U. S. Justice Clarke, "is a game played by ambitious old men, with the lives of young men for stakes."

People who have the least to say usually have the most to talk bout.

The principal speaker at the Lions Club at its meeting last week was C. E. Parsons, who took gardening as his subject.

One good thing about much of the jazz music, is that it sounds just as well played backwards as forwards.

You may forget about your income tax return, but Uncle Sam has a deep and affectionate memory, and will not forget you.

A stooping posture is called unhealthy, tho the exercises occurring when the kids used to bend over father's knee out in the woodshed were generally called wholesome.

Heed noises in car, advises an automobile journal. Does that mean those continuously emanating from the back seat?

Tongue Shows if
Bilious, Constipated

Hurry Mother! Even a fretful, peevish child loves the pleasant taste of "California Fig Syrup" and it never fails to open the bowels. A teaspoonful today may prevent a sick child tomorrow.

Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

OLD FOLKS SAY
DR. CALDWELL
WAS RIGHT

The basis of treating sickness has not changed since Dr. Caldwell left Medical College in 1875, nor since he placed on the market the laxative prescription he had used in his practice.

He treated constipation, biliousness headaches, mental depression, indigestion sour stomach and other indisposition entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of Dr. Caldwell's Syrup Pepsin, a combination of senna and other mild herbs, with pepsin.

The simpler the remedy for constipation, the safer for the child and for you And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with strong drugs?

A bottle will last several months, and all can use it. It is pleasant to the taste, gentle in action, and free from narcotics. Elderly people find it ideal All drug stores have the generous bottles or write "Syrup Pepsin," Dept. BB Monticello, Illinois, for free trial bottle

Makes Life Sweeter

Next time a coated tongue, fetid breath, or acrid skin gives evidence of sour stomach —try Phillips Milk of Magnesia!

Get acquainted with this perfect antiacid that helps the system keep sound and sweet. That every stomach needs at times. Take it whenever a hearty meal brings any discomfort.

Phillips Milk of Magnesia has won medical endorsement. And convinced millions of men and women they didn't have "indigestion." Don't diet, and don't suffer; just remember Phillips. Pleasant to take, and always effective.

The name Phillips is important; it identifies the genuine product. "Milk of Magnesia" has been the U. S. registered trade mark of the Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1875.

After all, what is the most important thing in baking?

Is it measuring and mixing ingredients? Is it selecting *certain* ingredients? All Home Economists know that after all, the most important thing is the correct oven temperature.

For almost anyone using care can measure and mix good ingredients accurately and follow a tested recipe. But in the baking—that's where all your best efforts meet the real test.

Today, leading Home Economists are turning to a device that keeps the oven at any temperature. It is called the Oven Heat Control and is a part of the new Gas Range.

See these new Gas Ranges at your dealer's. Or phone or call at our office.

CHEROKEE PROSPERS

CHEROKEE, Mar. 16, (Special to The Nugget)—Mr. and Mrs. John Roth were visiting here Friday.

Miss Eloise Phelan is in Nevada City with her grandmother, Mrs. C. Cox, who had a slight operation on her foot Thursday.

The farmers are all happy after the rain as they can plow and get their spring's grain planted and gardens planted. We all hope the heavy frosts are over with.

James Anderson and Sam Jordon have rented the Borgness ranch formerly called the Oak Tree ranch They are going to have a large chicken ranch and it is a fine, sunny place for this purpose.

A great many here are suffering with bad colds and a touch of the flu.

The many friends of Mrs. W. Moulton of French Corral, were surprised when they picked up the Nugget Monday morning and saw where she met with such an accident. All her friends are glad to hear that she is making a fast recovery and all hope she will soon be home.

F. Phelan and wife of Grass Valley were visitors here Wednesday evening.

James Phelan and Jim Anderson and son are busy cutting wood. Jim Phelan expects to furnish his customers with lots of dry pine and oak wood.

L. Calanan who has been visiting in Oroville has returned home.

James and Jay Coughlin made a business trip to Nevada City Friday

Everybody is eating oranges. A large truck load passed through here Friday.

There is another mine to open soon at Cherokee. The parties have been here and found all OK. They are to start soon.

Thomas Bigelow was a county seat visitor Friday.

John Osborne had the misfurtune to seriously cut his hand while at work about his home.

F. F. Cassidy, W. A. Doctor, S. Lee Leiter and R. J. Bennetts motored to Sacramento Thursday to attend the conference between the California Highway Commission and the supervisors of Nevada and Sierra counties, are the former men were among the representative citizens present.

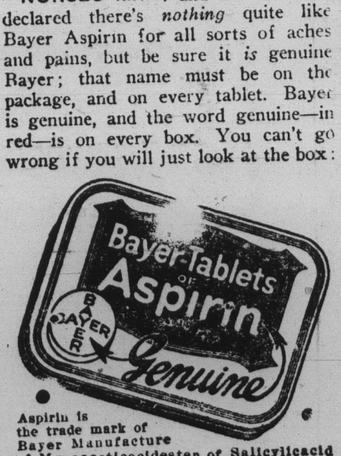

A banquet was held Saturday night at the climax for the horseshoe pitching tournament indulged in the past winter by the Native Sons, the Foresters and the Odd Fellows. Corte Christoforo Colomb proved the victor by a good margin

Peter tum Suden of San Francisco was a business visitor here the latter part of last week.

Mrs. H. F. Legg left this week for a visit with relatives in the bay region. She expects to be gone some time.

NURSES know, and doctors have declared there's *nothing* quite like Bayer Aspirin for all sorts of aches and pains, but be sure it *is* genuine Bayer; that name must be on the package, and on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box:

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Grass Valley

M. Rogers, deputy sheriff of Floriston, was here Thursday being called in the Patrida case as a witness.

The rainfall during the last week amounted to 2.68 inches. It was welcomed by all as there is a shorage of rain this year.

Mrs. C. O. Brown had as a visitor her father, W. E. Johnstoi, who was the former florist in Nevada City.

Mrs. Nellie Phelan is home from a visit in San Francisco of some time.

LEGAL NOTICE

The California Debris Commission will hold a public hearing at 11:00 A. M., March 26, 1929, in Room 728 Wells Fargo Bldg., San Francisco, California, to receive protests against granting the application of the Omega Mining Corporation to mine by the hydraulic process the Omega mine, located at Omega, Nevada county, draining into Scotchman's Creek, thence into the South Yuba, and to impound tailings in Missouri Ravine and Scotchman's Creek about one-half and one and one half miles respectively below the mine.

Dates of Publication—March 11, 18, 25, 1929.

In Five MILLION HOMES TONIGHT

There are times when all a mother's love can't soothe a fretful baby. No way of telling just what's wrong, yet something must be done. Castoria time! A few drops, and Baby has dropped off to sleep. Yet this marvelous means of quieting a restless infant is utterly harmless. There is not one ingredient but what all doctors know and approve, and would let you give your baby every day in the week. In fact Castoria is *a purely vegetable product*. Gas pains, constipation, even diarrhea can be dispelled in this same manner. Castoria is older than you are, but physicians still say "nothing better for babies." An old-fashioned remedy if you count its years, but parents are old-fashioned who still raise babies without its aid! And at least five million modern mothers keep it handy day and night, for twenty-five million bottles were bought last year! Buy yours now; don't wait until you need it.

Children Cry for Fletcher's CASTORIA

KESSLERS HAD FAMILY REUNION AT SAN JUAN

NORTH SAN JUAN, Mar. 16, (Special to The Nugget)—Wm. H. Kessler held a birthday party and family reunion at his home in North San Juan, Sunday March 10th. He prepared a dinner for his relatives who came from distant parts. Those present were, Mr. and Mrs. Leo Stein and son, Billy, Mr. and Mrs. Carl Rubel and two children, Mr. and Mrs. Babe Rubel Mr. and Mrs. Paul Hyliman and three children, childrenMrs. Rubel, from Marysville; Mr. and Mrs. Oliver Kessler and two children from Hollister. Mr. and Mrs. Frank Looze and Percy Clay and two children started from Marysville but car trouble caused them to turn back at Bridgeport.

Miss Lucille Fogarty is visiting Mrs. Joe Lavezzola of Downieville, formerly Mrs. Ruby Thompson.

Mrs. Ella M. Austin, County Superintendent of Schools made an official visit here last week.

Mrs. Joe Holland has returned from visiting her daughter in Oakland.

Charles Covell and two sons, Orville and Thurston, have returned from Colfax and are mining on the river.

Gordon Kessler and son, Everett, Perry Northcott Nafe Thompson and Orville Covell left Friday morning for Santa Barbara.

The people of North San Juan regret the death of Mr. Sibley at the sanitarium at Nevada City. Mr. and Mrs. Sibley formerly lived in San Juan and have many friends here.

Burt and Viola Tebo gave a show Saturday night which was well attended in spite of the rain.

R. W. Brown, who had charge of the Nevada City-Downieville road construction is here making a survey of the proposed Tahoe-Ukiah highway. He is in the contruction work for himself these days and is preparing a bid on the work.

Mrs. W. E. Moulton of French Corral is making a good recovery at the Nevada City Sanitarium from a recent acidental shooting in her husbands store.

The trial of Thomas Patrido of Truckee charged with a statutory crime against a young Mexican girl occupied a jury sesion of superior court Thursday and the defendant was acquitted by the jury. E. H. Armstrong appeared for the defendant.

Mrs. Thomas Corcoran is recovering from a severe sick spell.

LEGAL NOTICE

SUMMONS
No. 5713

In the Superior Court of the State of California, in and for the County of Nevada.

ECHO M. GOODWIN and LUL GOODWIN, his wife, Plaintiffs,
—vs—
JOHN W. O'NEILL; A. A. CHARONNAT; I. C. LINDLEY, S. T. ALLEN; NEVADA IRRIGATION DISTRICT, a corporation, AND ALSO ALL OTHER PERSONS UNKNOWN CLAIMING ANY RIGHT, TITLE, ESTATE, LIEN OR INTEREST IN THE REAL PROPERTY DESCRIBED IN THE COMPLAINT ADVERSE TO PLAINTIFFS' OWNERSHIP OR ANY CLOUD UPON PLAINTIFFS' TITLE THERETO, Defendants.

Action brought in the Superior Court of the State of California, in and for the County of Nevada.

W. E. WRIGHT, Attorney for Plaintiff, Nevada City, California.

THE PEOPLE OF THE STATE OF CALIFORNIA SEND GREETINGS TO: JOHN W. O'NEILL, A. A. CHARONNAT, I. C. LINDLEY, S. T. ALLEN, NEVADA IRRIGATION DISTRICT, a corporation; and also all other persons unknown claiming any right, title, estate, lien or interest in the real property described in the complaint adverse to Plaintiffs' ownership, or any cloud upon Plaintiffs' title thereto, Defedants.

You and each of you are hereby directed to appear and answer the Complaint in an action entitled as above, brought against you in the Superior Court of the State of California, in and for the County of Nevada, within Ten (10) days after the service upon you of this summons, if served within this County, or within thirty (30) days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required the said Plaintiffs will take judgment against you for any money or damage demanded in the Complaint as arising upon contract or they will apply to the Court for any other relief demanded in the Complaint.

The said action is brought by the above named Plaintiffs against the above named defendants, and each of them, to quiet Plaintiffs' title to the land and real property described in the Complaint on file in said action and hereinafter particularly described, and to determine the adverse claims of the above named defendants, and each of them, and of all unknown persons to, and clouds upon the title to the said real property and the whole thereof pursuant to the provisions of Sections 749, 750 and 751 of the Code of Civil Procedure of California, and that said real property is situate, lying and being in the County of Nevada, State of California, and is particularly described as follows, to-wit:

All those certain lots, pieces or parcels of land situate, lying and being in the County of Nevada, State of California, and bounded and particularly described as follows, to-wit:

The North West quarter (NW ¼, the West half (W½) of the West half (W½) of North East quarter (NE¼); the North Half (N½) of South East quarter (SE ¼) and the South West Quarter (SW¼) of South East quarter (SE¼) of Section Eleven (11), Township sixteen (16) North, Range 9 East, Mt. D. B. & M.

The object of said action is to obtain the judgment of the Court against said defendants and each one of them, known and unknown as follows:

That all adverse claims to, and all clouds upon the title of plaintiffs to said real property or any and every part thereof be determined by the judgment and decree of said court, and that it be decreed that plaintiffs are the sole owners in fee of said real property and the whole of said real property herein described, being the same real property described in the Complaint of Plaintiffs on file herein and that plaintiffs are in possession of the property and entitled to the possession of the said real property, and the whole thereof, and that the defendants have not, and that no one of said defendants, including the unknown persons made defendants herein, have any right, title, estate, lien or interest of any kind whatsoever, in or to or on the said real property or any part thereof, and that said defendants, and each and every one of them, known and unknown be forever debarred, enjoined and restrained from making or asserting any claim whatsoever in or to said real property, or any part thereof, adverse to plaintiffs, and that the title of said plaintiffs in and to said real property and the whole thereof be forever quiete and adjudged good and valid, and for such other and further additional order, judgment, decree and general relief as is meet and proper in the premises, and for costs of suit.

Given under my hand and the seal of the Superior Court of the State of California, in and for the County of Nevada, this 14th day of January, A. D., 1929.

GEORGE COUGHLAN,
[SEAL] Clerk of said Superior Court.

First Publication—January 28, 1929.

Dates of Publication—Jan. 28; February 4, 11, 18, 25; March 4, 11, 18, 25; April 1, 8, 1929.

Messrs. A. C. Travis and F. N. Coombs were in town Friday on their way to their mining properties at Graniteville which they are developing. They expressed great interest in the coming special mining review to be put out by The Nugget and left orders for extra copies.

Philip Curnow and T. B. English of North Columbia were visitors in the Pleasant Valley section looking after the latters cattle that are on paiure there.

Sheriff George R. Carter attended the convention of sheriffs and peace officers, which was held in Sacramento during last week.

Phone Number One We Deliver

GOLFERS LEAVE EARLY

A number of golf fans left early Saturday afternoon for the Placerville course where a tournament was staged yesterday between the Placerville and the local clubs. Those from Nevada City in the early party were W. E. Wright, Arthur M. Hoge, Fred F. Cassidy and Gove C. Celio. They expected to play the course on arrival and familiarize themselves with the hazards and bunkers on the course.

She'll Learn

A young woman, one of the newlyweds, who set up housekeeping, wanted to show her hubby how smart she was one day before the warm wave struck the city, so she called up a coal dealer and ordered "a ton of coal." The coal dealer asked her as to what kind of coal, the young woman failing to specify whether it be pea, nut, stove or furnace coal. When the dealer got through informing her of the different sizes of coal she asked for the "nicest shade of black coal." Apparently the young bride thought she was purchasing a hat or a dress.—Salem News.

Truth About Petrification

There is an old superstition that if a piece of hickory wood is put in water it will turn to stone in seven years. Of course it is not true. No wood ever turns to stone. Even wood which petrifies does not actually turn to stone. The wood merely acts as a mold while minerals from water or the atmosphere are deposited as the wood decays. The length of time required for an object to petrify depends upon circumstances. It may be a few years or a thousand. Usually it requires a long period.—Exchange.

Extremely Ancient Eggs

After cutting his hand on the top of a high cliff, an explorer found a line of egg shells springing like crocuses out of the ground. These proved to be parts of shells laid by a dinosaur—a prehistoric creature that lived probably ten million years ago.

Many of these eggs, supposed to be the oldest in the world, have been recovered from the sands of Mongolia. Bits of them were formerly made by primitive people into ornaments for women's necks.

Overcoming Fear of Dark

Children who suddenly form an aversion to the dark can often be helped in overcoming this fear, by becoming more familiar with the dark. We might play games in dark rooms, and occasionally send the children to unlighted rooms for sweets or new toys. Sometimes giving a flashlight, which he himself can turn on at a moment's notice has been most helpful.

Nevada Royal Arch Chapter conferred the Mark Master degree on two candidates at a special meeting.

THE SOCIAL WHIRL

STILLMAN HULINGS IN GOLDEN WEDDING EVENT

The William Schwartz home in Grass Valley was beautifully decorated in a yellow color scheme last Sunday to celebrate in a proper manner the golden wedding anniversary of Mr. and Mrs. Stillman Huling of Auburn. Mr. Huling is an uncle of Mrs. Schwartz. Twelve relatives gathered around the festal board and a most pleasurable occasion was enjoyed. Mr. Stillman Huling and Miss Carrie Mott were wed in Milton, Idaho. Many years have ben spent in California however, a portion of the time at Smartville.

Daffodills and acacia were used for the color decorations and made a very charming setting and particularly in keeping with the spirit of the occasion. Mrs. Schwartz proved a most charming hostess and the event was one long to be remembered.

DAS DEUTCHE ESSEN DEN NEVADA CITY ELKS

One of the most enjoyable dinners staged by the Elks was staged last Thursday night as a Dutch dinner, and Dutch it was even to the neat "speisekartes" at each place, giving the appropriate name for each article on the menu. Owing to the inability of some of the antlered brethern in translating, oberkoeche Herr Emil Ott brought out Herr Karl Kopp, who interpreted the menu for the less educated. There was a large turnout for the occasion. The committee in charge consisted of Herrs Emil Ott, Ernie Schreiber, Karl Kopp, Louie Kopp, Gove Celio and William Fouyer.

Exalted Ruler Tom Richards, who tried to put over some stage French on the Dutch occasion had the privilege of contributing several kopecks to the charity box.

at the movies

MONDAY—Clara Bo win "Three Week Ends." The first talking and singing pictures to be shown here will interest you. The Fixers is a spicy comedy. A fine program all the way through.

TUESDAY and WEDNESDAY—Charlie Chaplin in "The Circus." His best one yet. Rubber Necks is the comedy. Danger Trail is a western two reeler. A big show for 50c

FRIDAY—"The Two Outlaws." Tall Timber is the comedy. The Scarlet Arrow.

SATURDAY—"The Devils Trade Mark" with Belle Bennett. The Cider Path is the Collegian showing.

SUNDAY and MONDAY—"Interference," one of the lae big Paramount pictures you will like. Starring Doris Kenyon, Clive Brook, Evelyn Brent and William Powell. A melodrama of the upper crust. The Comedy is Whoopee Boys. M. G. M News.

Some of the coming attractions are:

The Battling Sexes.
The Tempest.
Sorrows and Son.
hTe Wedding March.

DEPUTY SCADDEN BUSY

District Deputy Grand Exalted Ruler Phil G. Scadden spent a busy week with three official visits the past week. Wednesday night saw him at Chico, Thursday night at Redding and Friday night at Marysville. A number of local Bills went over for the Marysville meeting headed by Exalted Ruler Tom W. Richards. George Walling acted as chauffeur for the distinguished visitor.

Getting there ahead of the trouble

DURING the afternoon of March 17, 1928, an alarm bell rang in a telephone test station. This meant that a puncture had been made in the air-tight sheath of a busy inter-city cable. The men on duty knew that the injury was somewhere within 50 miles.

Highly developed locating devices were instantly applied and in sixty-five minutes the trouble spot was located. By 7:15 in the evening, before the break in the sheath had affected service on any of the 248 pairs of wires in the cable, the repairs had been made without one conversation being interrupted. This special alarm system is one of the many mechanical and electrical wonders developed by Bell System engineers to guard telephone conversations.

Automatic warning signals, electrical locating devices, constant testing of all switchboard apparatus and circuits—these are some of the ceaseless efforts that so effectively reduced interruptions to service on Bell lines in 1928. There is no standing still in the Bell System.
